ABOUT OLYMPIC INDUSTRIES ///

ESTABLISHED IN 1969. ///

Olympic Industries design and construct steel buildings from small garden utility sheds to large industrial buildings. It is a family business based in Adelaide, South Australia and established in 1969. Combining the know-how of architectural designers, the skills of the manufacturer and the experience of licensed installers, Olympic Industries continues to be a multi award winning and leading company in the Australian home improvement market. Our many awards include the BHP Trophy for the Best Use of Australian Steel and the ANZ Bank Award of Excellence.

MATERIALS /// FACTORY DIRECT

A significant initiative was taken in 1978 when Olympic Industries purchased roll forming machinery and started rolling its own steel sections. The big breakthrough came with the development of the 75C Steel section, which revolutionised garage construction in Australia. The guarantee of quality offered by Olympic Industries has enabled us to become one of the leading suppliers of steel garages in Australia. We have developed industrial building designs in excess of 20,000 square meters. The primary supplier of materials is BlueScope Steel and extensive use is made of Colorbond® and Galvaspan® steel in Olympic products and structures.
